About

From a young age I have worked towards having a career in the technology industry.

I'm looking for a company that has a place for a coder who loves to pick up new technologies and wants to build their skills for the future.

Primary Skills

- Java
- PHP
- PLSQL/TSQL/SQL
- HTML/CSS/JS
- Grails/Struts
- Angular
- Bootstrap
- Batch File Scripting

Experience

Software Developer

EVtechnologies - Clayton, MO   *2014-Present*

> Designed and implemented a Java process to automate customer data loads with email and slack notifications.

Other Accomplishments

- Provided product support to customers by troubleshooting issues and providing software fixes for both the main product and for customized software.
- Increased product stability by finding and fixing bugs.
- Added new features to solve current customer problems.
- Write internal software to automate and streamline processes.

Development Internship

EVtechnologies - Clayton, MO   *2011-2014*

> Built an application to help customers size their Business Objects systems before they upgrade to a new version.

Other Accomplishments

- Wrote an internal web application to store and share passwords within the company.
- Learned Objective-C for iOS to create an app that at helped customers manage their Business Objects systems, and view server metrics.

Education

Lewis and Clark Community College

General Education   2009-2011

Southern Illinois University Edwardsville

Computer Engineering - BS   2011-2013
